ISPLG24 Series

Inergy Solutions has manufactured a G24 PL lamps replacement in LED that can work with 2-Pin Diagonal or 4-Pin sockets. With a full 360° spectrum, replace existing fluorescent G24 lamps by plugging it into or bypassing the existing ballast. Use the lamp in the vertical or horizontal applications. Unlike fluorescents, the Inergy Solutions PL Lamp does not need time to warm up, it turns on instantly.

Applications

- Recessed downlight
- Security lighting
- Sconces
- Residential and commercial lighting

Product Information

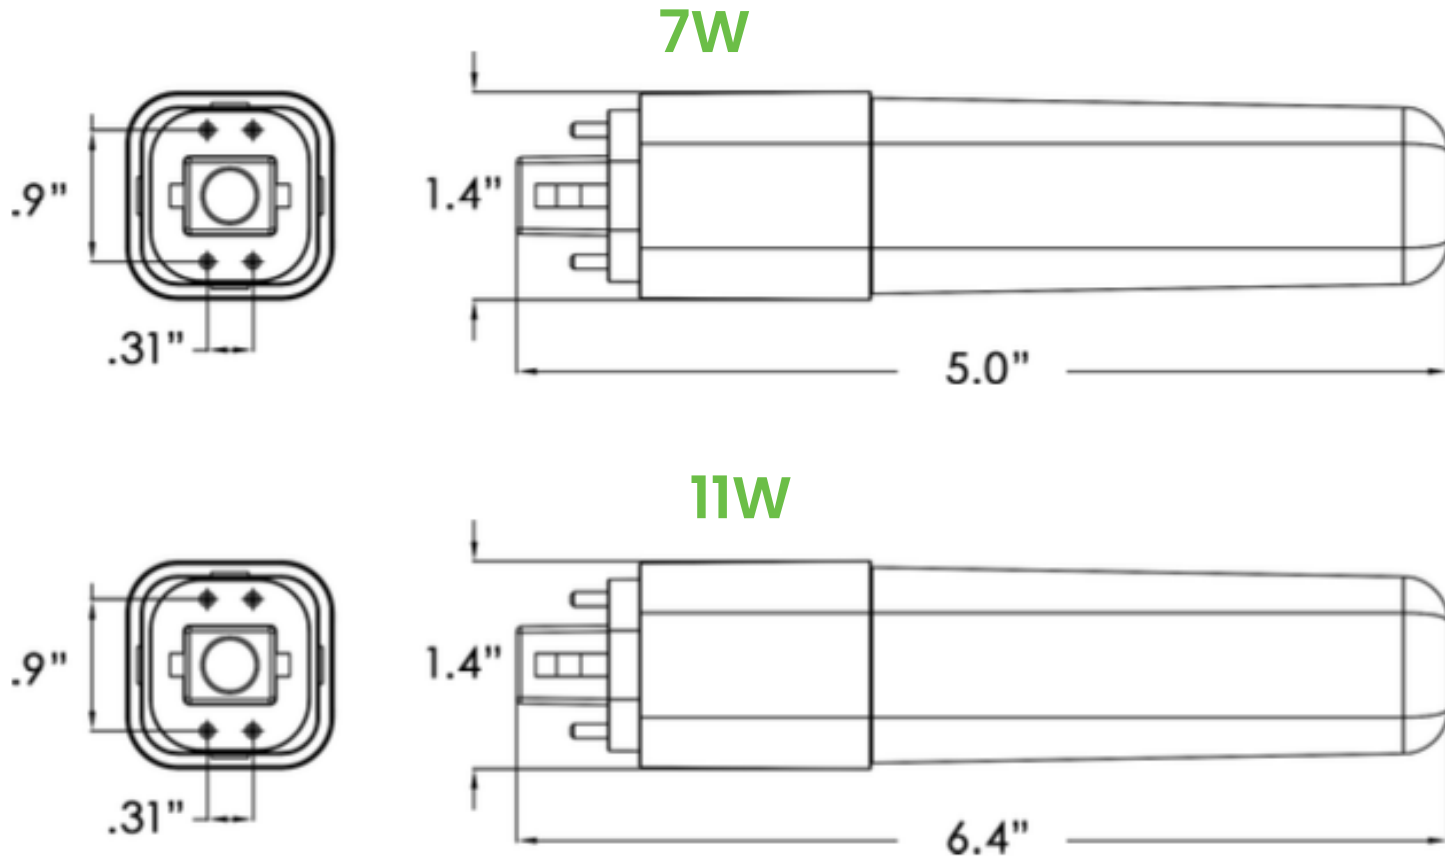

- Available in three wattages to replace existing 13, 18 or 20W
- Install using existing ballast
- Compatible with existing fluorescent fixtures with no rewiring needed or choose to bypass the ballast completely.

ISPLG24 **Watts** **Color** **Warranty**
